Assignment Guidelines:

After completing your windshield assessment, use internet resources to learn about the demographic makeup of your community. For this assignment find the following information. *(Please note: You may need to use county data or obtain data by zip code.)*

- Population Characteristics: (Census Data) Total population; Population by age, gender, race/ethnicity, education, occupation, socio economic status.

- Health status (morbidity & mortality data): pregnancy outcomes; by age, gender, race; noted health disparities

- What are the leading causes of illness and death in your community?

- List three health problems in this community that should be of concern to the nurse

    o Describe *at least one* primary prevention interventions for each health problem

    o Describe *at least one* secondary prevention intervention for each health problem

    o Describe *at least one* tertiary prevention intervention for each health problem

- Compare and contrast the information the census and health status data with your Windshield Survey observations (quantitative data)

- Answer: How does this information help to guide your health promotion activities for individuals and families who live in this community?

- References

- Submit this report into the designated Assignment Drop Box by Due Date.
